

VIRTUAL WATERASSISTANT™

YOUR HOME IS YOUR #1 INVESTMENT, BUT A BASEMENT FLOOD CAN LOWER THAT VALUE BY THOUSANDS OF DOLLARS.

The **Virtual Water Assistant** solution protects your home and your investment by constantly monitoring conditions, activating a backup pump when needed, and alerting you (by text message or e-mail) when your basement is in danger of flooding. At home, at work, or across the globe – you are protected and informed.

HOW IT WORKS

Virtual Water Assistant is a cloud based wireless ecosystem that enables 2 way communication between you and your device. Your device communicates to the cloud by wirelessly transmitting to the gateway that is plugged into your home's router. Once the data is in the cloud you can access it through the Virtual Water Assistant website using a smartphone, tablet or computer.

BENEFITS

- Easy to install and use – plug and play wireless setup with no wiring to run in your home
- Provides advanced notification when your home is in danger of flooding
- No long term contracts, cancel at any time
- Remotely test your system from anywhere in the world
- Access to helpful resources to help keep your basement dry

COMPATIBLE WITH THESE POPULAR BRANDS:

MYERS® · HYDROMATIC®
