

HI-FLOW™

BACKWASH VALVE

Trouble-free performance for side-mounted sand and D.E. filters.

Our Hi-Flow valve is designed for maximum performance and working pressures. It features the same quality and reliability you've come to know and expect from Pentair. It's pre-plumbed for easy installation in side-mounted sand or D.E. (diatomaceous earth) filter applications. It also features full six-position, positive lock operation plus a special winterizing position, providing access to a full range of filtration system capabilities.

HI-FLOW™ BACKWASH VALVE

Full-feature valve offers maximum control.

The Hi-Flow valve provides precise control of pool filter functions. And as with all Pentair® valves, the Hi-Flow valve is designed to perform flawlessly for years to come.

KEY FEATURES

Solid, injection-molded PVC housing

Permits leak-free solvent welds to PVC piping.

One-piece handle

Large, reinforced one-piece handle for years of trouble-free operation.

High efficiency, center intake diverter

Made of heavy-duty, glass-filled PPO Resin for strength and heat resistance.

Engineered

To accommodate up to 125 gpm flow rates with proper component combinations.

Marked ports

Clearly and permanently marked ports for ease of plumbing.

Two-inch inlet and outlet ports

For unrestricted water flow.
